DADSON MANUFACTURING INC. RECEIVES ISO 9001 AND ISO 13485 CERTIFICATION FROM THE NATIONAL STANDARDS AUTHORITY OF IRELAND

Nashua, New Hampshire April 21, 2009 – Dadson Corporation of Grain Valley, Missouri, the premier medical device manufacturer in the Midwest, specializing in the manufacturing and assembly of high-tech medical products, has received ISO 9001:2008 registration and ISO 13485:2003 certification. The audits were performed by the National Standards Authority of Ireland, Inc (NSAI) and showcase Dadson’s, and their subsidiary Epic Medical Concepts and Innovations’ (EMCI), commitment to quality medical device manufacturing practices.

“ISO 9001 is recognized as the world’s benchmark of quality systems and companies that are ISO 9001 registered have the systems in place to maintain quality and focus on continual improvement of quality. ISO 13485 is an international standard that showcases Dadson and EMCI’s ability to provide medical devices and related services that consistently meet customer requirements and regulatory requirements applicable to medical devices and related services,” says Chris Morrell, Vice President of NSAI. “Dadson and EMCI should be proud of their achievement and we hope that ISO 9001 and ISO 13485 open up new international markets for their products.”

“Dadson and EMCI have the highest standards for everything that we do and ISO 9001 and ISO 13485 prove this,” says James R. Lucas, President
